

Creation HygieneFlor™ at Scottish Sea Farms, Shetland Isles

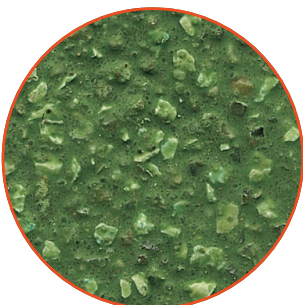

A Creation HygieneFlor™ is a FeRFA Type 8 polyurethane screed with perimeter coving and integral microbicide. It is a seamless, hard wearing and easy to clean floor that is ideally suited to environments where food or drink is processed or prepared.

The materials and methods used to create this floor have been researched and approved by The Campden and Chorleywood Food Research Association Group and also meet the European Directive on Hygiene of Food Stuffs 93/94/EEC.
